

POP-UP LAPTOP KEYBOARD

10046508

ABSTRACT

An ergonomic laptop computer or other apparatus is disclosed that provides a user
5 a with a more comfortable angle for the user's wrists and hands while using the
apparatus. The apparatus includes a keyboard housing having a top surface comprising a
plurality of keys, a bottom surface operationally connected to a main computer body and
positioning supports connected to the keyboard housing that extend and adjust to allow
the keyboard to change its slope relative to the main computer body. The apparatus may
10 be standard on laptop computers or sold as a retrofit kit that replaces existing non-
ergonomic laptop keyboards.
